

B1 1. (twice amended) Device for storing and transporting live fish, comprising a fish bag being equipped at both ends with bag rings, and wherein at each end there being arranged a second netting with purse lines.

6. (new) Device for storing and transporting live fish according to claim 1, wherein said bag includes a tubular webbing material.

B2 7. (new) Device for storing and transporting live fish, comprising a fish bag in the form of a tubular webbing material, the tube having at both ends bag rings, outside of which bag rings and at each end of the tube there being arranged a second open netting equipped with purse lines for adjusting the flow-through of water in the device.

8. (new) Device for storing and transporting live fish according to claim 7, wherein several fish bags are coupled together through locking rings located at the site of the bag rings.

9. (new) Device for storing and transporting live fish according to claim 7, wherein at one end of the fish bag there are located towing lines.

10. (new) Device for storing and transporting live fish according to claim 7, wherein there is applied at least one brace to the fish bag.

11. (new) Device for storing and transporting live fish according to claim 7, wherein around the fish bag there is located a fish netting.

12. (new) Device for storing and transporting live fish according to claim 7, wherein said fish bag includes a tight-walled material.

13. (new) Device for storing and transporting live fish according to claim 7, wherein said fish bag includes a flexible material.

14. (new) Device for storing and transporting live fish comprising a tubular bag formed from a webbing material, a bag ring at each end of said tubular bag, outside of each bag ring and at each end of the tubular bag there being arranged a netting equipped with a first and second purse line, said first purse line disposed at a transition between said netting and webbing material of said tubular bag and said second purse line disposed at an end of said netting, said purse lines being adjustable to adjust the flow-through of water in said device.

15. (new) Device for storing and transporting live fish according to claim 14, said second purse line being completely closed during transport.

16. (new) Device for storing and transporting live fish according to claim 14, wherein said second netting is funnel shaped.

17. (new) Device for storing and transporting live fish according to claim 14, wherein several fish bags are coupled together through locking rings located at the site of the bag rings.

18. (new) Device for storing and transporting live fish according to claim 14, wherein at one end of the bag there are located towing lines.

19. (new) Device for storing and transporting live fish according to claim 14, wherein there is applied at least one brace to the fish bag.

20. (new) Device for storing and transporting live fish according to claim 14, wherein around the fish bag there is located a fish netting.
